PROFESSIONAL SUMMARY

Results-driven professional with 4+ years of experience in Robotic Process Automation (RPA) and VBA development, currently transitioning into Data Analytics. Skilled in Python, SQL, and machine learning, with hands-on experience in data preprocessing, analysis, and building predictive models. Proven ability to automate data-driven processes, improve efficiency, and derive actionable insights. Seeking remote opportunities to leverage combined expertise in automation and data-driven decision-making.

WEBSITES, PORTFOLIOS, PROFILES

SKILLS

Data Analytics & Machine Learning: Python (Pandas, NumPy, Scikit-learn), Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Machine Learning (Regression, Classification, Clustering), Data Visualization (Matplotlib, Seaborn), SQL

Tools & Other Skills: Advanced Excel, Data Interpretation & Reporting, Problem Solving, Analytical Thinking

Automation & RPA: UiPath (Studio, Orchestrator, REFramework), Blue Prism, VBA Macros, Process Mapping (PDD, SDD), Exception Handling, Bot Deployment & Monitoring

WORK HISTORY

Data Analyst Intern | ICT Academy - Remote *11/2023 - 07/2024*

- Performed data preprocessing, cleaning, and transformation on customer datasets
- Conducted exploratory data analysis (EDA) to identify patterns and trends
- Supported customer segmentation using data-driven approaches
- Generated insights to improve marketing strategy and decision-making

Key Projects:

• Customer Segmentation for Marketing Campaigns
- Built K-Means clustering model to segment customers
- Used Elbow Method and Silhouette Score for optimization
- Generated insights to improve marketing targeting

• FIFA Player Value Prediction

- Developed predictive models using Linear Regression and XGBoost
- Performed EDA and feature engineering

• Social Media Product Purchase Prediction
- Built classification model to predict customer purchase behavior
- Developed and deployed using Flask

App & Dev Support Engineer | Conduent - Kochi, India *09/2022 - 02/2023*

- Developed VBA-based automation to process and manage large volumes of invoice data
- Automated data extraction, transformation, and file handling, reducing manual effort significantly
- Improved data accuracy and consistency by minimizing manual intervention
- Provided L2/L3 production support, diagnosing and resolving application and automation issues
- Collaborated with business teams to enhance system performance and workflow efficiency

Senior Associate Consultant | EY - Trivandrum, India *07/2019 - 08/2022*

- Designed and developed scalable RPA solutions using UiPath and Blue Prism for high-volume business processes
- Automated workflows, reducing manual effort by **40–60%** and improving operational efficiency
- Analyzed process data to identify automation opportunities and optimize workflows
- Worked across full RPA lifecycle: requirement gathering, design, development, testing, and deployment
- Developed reusable components using REFramework to improve development efficiency
- Implemented exception handling and logging mechanisms to ensure reliable automation
- Collaborated with cross-functional teams and clients to enhance system performance

EDUCATION

Marian College Kuttikkanam - KUTTIKANAM *05/2016*
BCA: Computer Application

CERTIFICATIONS

Machine Learning Foundations
Python for Data Visualization
Problem Solving Techniques
UiPath RPA Developer Training (REFramework)

SOFTWARE → TOOLS & TECHNOLOGIES

Python (Basic for automation support)
Microsoft Excel (Advanced)
UiPath (Studio, Orchestrator)
Blue Prism
VBA
